

## 2-WAY JUNCTION SYSTEMS

### New: 8-pole T-Junction

ESCHA is extending the T-Junction systems product portfolio by an 8-pole version

Halver, 09.06.2008

We cannot imagine the industrial automation today without the M12 round connector. Above all, the 8-pole versions have recently become the standard. That is why ESCHA is extending its 2-way junction system by an 8-pole version. The new T-Junction is available with 1:1 wiring and in various configurations.

So far, this junction system has only been available as 4- and 5-pole versions. As it is the case with the previous junction versions, the new T-Junction meets the IP67 requirements. All ESCHA junction systems are adaptable to various application areas due to their operating temperature range between -30°C and +90°C.

ESCHA\_0208: 8-pole 2-way Junction  
with 1:1 wiring

#### ESCHA – About us

ESCHA is a leading supplier in the field of connectivity and enclosure technology. The family enterprise has been developing and manufacturing in Halver, Sauerland for more than 25 years. More than 300 employees help create innovative products, and thus continue to extend the product portfolio. ESCHA fulfils customers' specific requirements through highly in-depth development and production.
